WIRESHARK SOC LAB | IDENTIFY THE ATTACKER'S IP
TASK 3 OF 10
Reset Wireshark
LAB 3 Identify the Attacker's IP
ENLARGE
Scenario. You are a SOC analyst. A staff member has reported unusual traffic to your company's web server. Capture the packets and analyze them in Wireshark. Find out what type of attack this is and what the attacker's IP address is.
TASK 3 OF 10
10 MARKS
Most PCs send only one or two of these packets. One IP address sends a long block of them, one after another. What is the attacker's IP address?
Example: 10.1.2.3

WIRESHARK SOC LAB | FOLLOW TCP STREAM, PART 2
TASK 2 OF 10
networkwalks.com/wireshark-lab5/
LAB 5 Follow TCP Stream, part 2
Scenario. A staff member browsed the company intranet. An admin thinks someone left a secret inside one of the web pages. Capture the traffic and use Follow TCP Stream to find the hidden text.
TASK 2 OF 10
10 MARKS
A staff member opened five pages on the company intranet. An admin says one of these pages has a hidden note inside. Which page is it?
Select your answer…
Hint 1 of 2. Type http in the filter bar and press Enter. Right-click a GET packet, choose Follow, then TCP Stream. Change the stream number at the bottom to see the next page.
This task now scores up to 90% of its marks.
